PROFESSIONAL SUMMARY

Web Developer with 5+ years of hands-on experience in WordPress theme and plugin development, React.js, REST API integration, and CRM automation via GoHighLevel. Experienced in UI/UX design, FTP deployment, and UAT testing across multiple live client projects.

WORK EXPERIENCE

Web Developer | AI Automation — AiMan Cloudworks

July 2025 – Present

- Led pre-project discovery meetings with clients to map business workflows, define requirements, and align project scope before development.
- Delivered custom automation solutions that streamlined client operations and eliminated repetitive manual tasks.
- Integrated WordPress with GoHighLevel CRM via REST API, automating lead and contact data sync to improve client sales pipeline efficiency.
- Built custom WordPress plugins to manage API authentication and handle HTTP communication between WordPress and third-party platforms.
- Developed full custom WordPress themes from scratch using PHP, HTML, CSS, and JavaScript aligned to client branding and requirements.
- Configured domain mapping across WordPress Multisite networks, including DNS record management and cPanel setup for multiple client domains.
- Deployed websites to production hosting via FileZilla FTP, managing server file structure and environment configuration.
- Maintained WordPress installations including plugin management, custom post types, and ongoing site administration.
- Designed and deployed an AI-powered WhatsApp chatbot serving as a virtual salesperson, delivering dynamic and context-aware responses to customer inquiries based on client business and product data.
- Contributed to the frontend development of Jobtepi (jobtepi.my), a Malaysian creator and freelance marketplace platform. Building responsive UI components, translating designs into functional web interfaces, and collaborating with the team to deliver a performant and user-friendly experience

- Developed and deployed custom WordPress themes and plugins from scratch, aligned to project requirements and client branding.
- Maintained and monitored live WordPress websites, ensuring uptime, performance, and content accuracy
- Resolved critical server-side issues via FTP using FileZilla, including white screen of death (WSOD) debugging and malware detection and cleanup.
- Designed UI/UX for mobile applications, myBaiki, MyAestic, and Getudio - covering user interface design, screen flows, and overall user experience.
- Mapped out system architecture and user flow diagrams for mobile apps, translating business logic into structured and intuitive app navigation.
- Conducted competitor research and market analysis to inform design decisions and identify feature gaps before development.
- Performed User Acceptance Testing (UAT) to validate system functionality against requirements and document defects for the development team.
- Supported the design team in producing marketing materials including posters using Adobe Photoshop and Illustrator.

Web & Digital Marketing Intern — Bangi Convention Center

Jan 2020 – Aug 2020

- Assisted in digital marketing campaigns, increasing social media engagement by 15% in 3 months.
- Updated website content and provided technical support for daily visitor traffic of 500+ users.
- Conducted competitor research that informed campaigns achieving 10% higher audience reach.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6), React.js, Bootstrap, Tailwind CSS

Backend: PHP, MySQL, WordPress (Theme Customization, Plugin Integration), MVC Architecture

Testing & QA: Manual Testing, Regression Testing, Test Case Design, Bug Reporting, A/B Testing

Automation & CRM: GoHighLevel (Sales Funnels, Landing Pages, WhatsApp Automation, Lead Management)

Tools: Figma, Adobe XD, Adobe Photoshop, VS Code, Git, GitHub, Chrome DevTools, Postman, npm, Composer, Netlify, cPanel, FileZilla, Trello

PROJECTS

Todo List Web App

Stack: React, Tailwind CSS, Create React App, shadcn-style UI, Font Awesome

- Built a responsive task manager with full CRUD operations — create, edit, complete, and delete tasks.
- Applied component-based architecture with client-side state management and reusable UI components.

Employee Management System

Stack: PHP, MySQL, HTML, CSS, Bootstrap, JavaScript, jQuery, AdminLTE, DataTables

- Developed role-based dashboards for HR and employees including leave request and approval workflows.
- Integrated dynamic tables with DataTables and built a responsive UI using Bootstrap and AdminLTE.

Online Room Booking System

Stack: PHP, MySQL, HTML, CSS, Bootstrap

- Developed a room reservation system with real-time availability checks to prevent double bookings.
- Built admin panel for booking management and full CRUD functionality for room scheduling.

EDUCATION

Diploma in System Module Development — Kolej Vokasional Sepang

PROFESSIONAL DEVELOPMENT & LANGUAGES

WordCamp Malaysia Attendee — WordPress best practices, modern workflows, and industry trends.

Languages: Bahasa Malaysia (Native) | English (Professional Working Proficiency)
